## *Our essence*

*Our relationship with sustainability and the local community is an integral part of our essence.*

*We are immersed in nature and thrive in it. We live **with and to respect the local flora and fauna**, in harmony with the natural experience.*

*We built our bungalows by **prioritizing the natural ventilation of the building** instead of choosing an air conditioner. We seek comfort with simplicity, charm, and poetry. The furniture and objects of the pousada are built with rustic, and recycled materials. We make living in nature the main experience, and that's why **we don't have air conditioning in our bungalows**. We purposely avoid excessive decoration to promote the connection with the essence of nature.*

*We choose not to have a power generator because of its environmental impact, and we discourage the use of helicopters at the pousada because what fly in the sky are birds and kites. We recycle all the waste and minimize our environmental impact.*

*Who opts for this experience, becomes a strong link in our chain. **We, together, are the essence.***
